Dear Councillor Wilkinson,

You can imagine our surprise to have someone forward the agenda for the January 6th meeting with our Water System on it! This notice being sent between Christmas and New Years was luckily detected by a diligent resident that made us aware of the proposal to go before council in January for approval!!!!

We called an Emergency Meeting that was held last night with over 40 residents present where we began to try to comprehend the information/ MTE report enclosed in that huge document.

With such a short time frame, I am requesting that the proposal decision be deferred to give us an opportunity to understand and digest the options proposed and the financial implications it will have on all of us.

Sincerely,  
Susan Sisco

Dear Councillor Wilkinson,

After pondering and reviewing the MTE Engineering report with the options proposed, I request that the MTE consultants along with Township staff explain the pros and cons of each option and why the need to rush this very expensive project to the 62 residents through council. This is a huge investment and amount of money to be asking us to pay out. I believe we are owed the courtesy of having the results of their report presented to us in a meeting where we all hear the same information / answers to our questions.

We appreciated it when the drainage report was presented to us in a professional manner where we were all invited to come to hear the results of their report and were able to ask questions and all hear the same answers. The amount being asked of each resident was significantly lower than the 50 thousand dollar price tag attached to this project. Therefore, I am asking that council defer any decisions on the PWS until we can be informed in a meaningful way to comprehend this massive, expensive project in our subdivision .

Sincerely,  
Susan Sisco
